

# God's Design

---

God's creation is the greatest proof of His existence.

It is said in all the ages that there has never been and never will be a man or woman just like you. You are unique and have no double. Every life is a fresh thought from God to the world. *Viola Walden*

All I have seen teaches me to trust the Creator for all I have not seen.

There is for me powerful evidence that there is something going on behind it all. It seems as though somebody has fine-tuned nature's numbers to make the universe. The impression of design is overwhelming. *Paul Davies, British astrophysicist*

I cannot see how it would be possible for a man to look down upon the earth and be an atheist. And I cannot conceive how he could look up into the heavens and say there is no God. *Abraham Lincoln*

There's nothing that's ever without significance or without meaning.

The human body is the most perfect machine ever made.

God's permanent creations of the earth, sun, moon and stars are forever!

It's so wonderful to look at God's creation. Everything God does is right. Everything is

the way it's supposed to be, even the little sparrows.

Astronomy [science] leads us to a unique event, a universe which was created out of nothing and delicately balanced to provide exactly the conditions required to support life. In the absence of an absurdly improbable accident, the observations of modern science seem to suggest an underlying, one might say, supernatural plan. *Nobel laureate Arno Penzias.*

You can't help but see the marvel of God's handiwork and design when you study His creation.

I marvel at how in a tiny backyard there is a whole miniature universe of creation: plant life, animal life, and bug life.

God's visible creation is an illustration of the things in the spiritual realm.

It's not just the universe as a whole that manifests design. Scientists find overwhelming design evidence no matter what volume size they investigate—the universe, our galaxy, planetary system, star, planets, cell, atom, and fundamental particles. On each of these size scales, evidence for extreme fine-tuning on the behalf of life and humanity persists. *Astrophysicist Hugh Ross.*

No human being, no human spirit, is created without the touch of the divine, the touch of the hand of God.

One little humble lowly chicken produces a marvel of creation every day—a beautiful ovular orb. Even one little lowly egg is a marvel of God's creation.

Why should we worry, when God's creation keeps right on faithfully going, constantly turning, revolving, rising and setting, not

questioning, not worrying, not faltering, knowing God's in complete control?

We look at the trees, the sky, and the beautiful creation all around us, and we know God lives; we know He's here!

The Lord is a master artist. He really puts some swirls up there in His sunsets, and His colors are gorgeous!

God made a few ugly things so that we'd appreciate the pretty things, a few thorns so that we'd appreciate the roses.

Everything in God's creation proves God exists—its perfection, its organization, its synchronization, its harmony, its unity, its balance.

The scientist is possessed by the sense of universal causation. His religious feeling takes the form of a rapturous amazement at the harmony of natural law, which reveals an intelligence of such superiority that, compared with it, all the systematic thinking and acting of human beings is an utterly insignificant reflection. *Albert Einstein.*

The material creation is the proof of the existence of the immaterial God.

When I see that glorious creation of God, I know that everything's under control.

Only God's creation is alive, reproductive, and self-repairing.

Just one tree is so marvelous a mechanism, a creation of God, that man can't understand it. Even one little cell is beyond man's comprehension.

It seems to me that when confronted with the marvels of life and the universe, one must ask

*why* and not just *how*. The only possible answers are religious. I find a need for God in the universe and in my own life. *Arthur L. Schawlow, Professor of Physics at Stanford University, 1981 Nobel Prize in physics.*

God's whole creation is a work of art that portrays His message of love.

God's creation is a witness without words.

A heathen philosopher once asked a Christian, "Where is God?" The Christian answered, "Let me first ask you, 'Where is He not?'" *Aaron Arrowsmith.*

We are, by astronomical standards, a pampered, cosseted, cherished group of creatures. If the universe had not been made with the most exacting precision, we could never have come into existence. It is my view that these circumstances indicate the universe was created for man to live in. *John O'Keefe, astronomer at NASA*

Just as behind a watch there had to be a watchmaker, so behind the intricate precision and timing of this great universe there had to be a great Creator or Designer.

Life is proof that there is God, because life is a miracle! *David Brandt Berg*

As we survey all the evidence, the thought insistently arises that some supernatural agency—or, rather, Agency—must be involved. Is it possible that suddenly, without intending to, we have stumbled upon scientific proof of the existence of a Supreme Being? Was it God who stepped in and so providentially crafted the cosmos for our benefit? *George Greenstein, astronomer*

To see God in everything makes life the greatest adventure there is.
